1. About the shots

All screenshots were taken with Jim Standard Edition version 2.0.0 on a Ubuntu Linux system with Java 6.

Click on the images to enlarge them.

2. Jim's main window

What you can see:

- The tag tree on the left (widely expanded)
- The big image panel on the right
- The menu and status bar on the top and bottom

3. Properties window

What you can see:

- The meta data linked with the image
- The tags of the image and the mechanism to add / remove them

4. Plugin Manager window

What you can see:

- All plugins currently installed
- The mechanism to add or remove the plugins

5. Search window of the JimSearch plugin

What you can see:

- The tag chooser for tags that result images must be tagged with
- The result list and what you can do with it ("ginny" actually is my dog)
